

RIO GRANDE 2019: THE SWIMLINE NEWNESS BECOMES A PROFESSIONAL TRAINING APPLIANCE

Personalized swimming programs:

- 5 pre-programmed and 3 individual workouts: choose from the slowest, most comfortable „floating” to the hardest exercise
- 3 personalized programs are available and can be edited to create a custom workout pattern

5 pre-programmed workouts:

- “Endurance”: will be executed at a constant intensity for the entire duration and allows to concentrate on technique and consistency
- “Interval”: performs high- and low-intensity intervals of equal step time
- “Random”: is a series of equal steps at random intensities
- “Fat Burner”: performs two successive steps at high-intensity for one step at low- intensity
- “Peak”: is a “pyramid” program where the intensity increases progressively until the maximum is reached. Then it decreases progressively to end at low intensity.

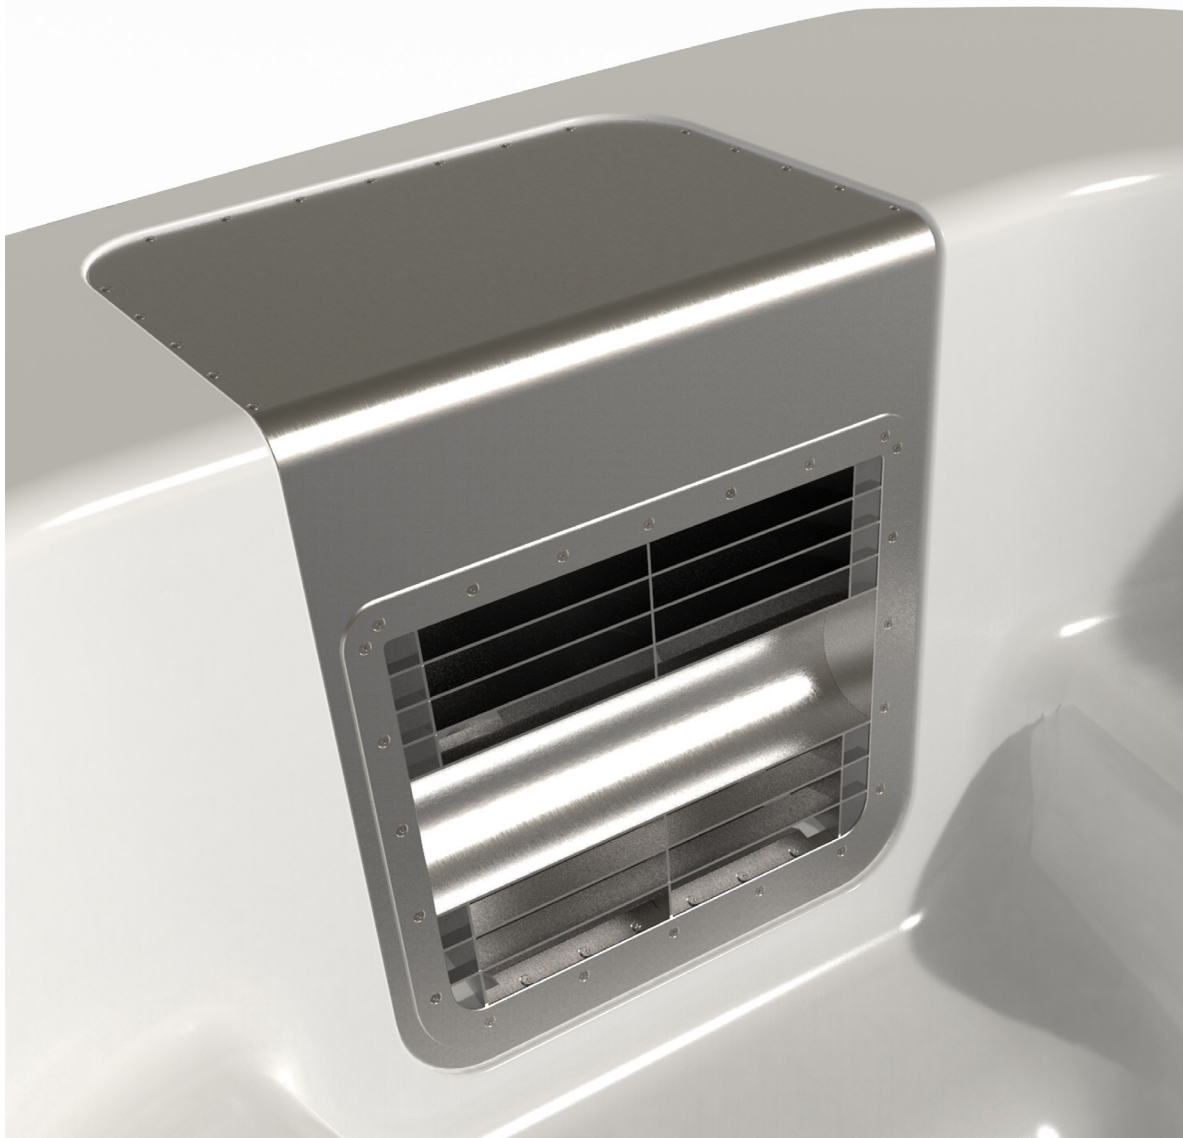

The W-Flow system:

- twice as much water against traditional types (180 m³/h)
- improved water flow width (50-60 cm) for the unique professional swimming (perfectly balanced swimming)

Rio Grande 2019 outstanding product properties:

- mechanical elements are separated from the hydro-space, so any mechanical repairs can be done without sluicing the water
- available with semi-inground cabinet, which allows to sink the spa halfway only in the ground without any concrete preparation
- the heat pump connection in the swim spa is fix and equipped with In.Grid system – consequently, the heating cost can be reduced to one-third of the electrical heating

The New Rio Grande 2019 is a perfect combination of a whole spa for the health of soul and a powerful, finely tuned fitness machine for improving your endurance.
