SMC shower tray

The SMC is a special glass fiber reinforced, smooth texture polyester sheet, which is pressured under high temperature, polymerized into the appropriate form of compressed elements to give it its final form and unmatched features.

This manufacturing process has been well established in other industries (aerospace, mechanical engineering, automotive industry), though the sanitary market has just

recently discovered and started to beginning to perceive the benefits of it over against previously used materials and technologies.

SMC shower trays' durability, quality is constant, thanks to the impregnated fiber reinforcement, but weights half as much as cast marble tray with similar characteristics. The ribs at the back side of the tray are strengthen the structure of the shower, while its weight is only slightly increases.

The soft material makes possible high-formatting, so the sharp corner shower SMC provides a much more aesthetic spectacle as acrylic counterparts.

80 FLAT ARCHED SHOWER TRAY

80 X 80 X 4 cm

SMC shower tray, chrome-plated
drain valve D:11,5 cm, syphon

90 FLAT ANGULAR SHOWER TRAY

90 X 90 X 4 cm

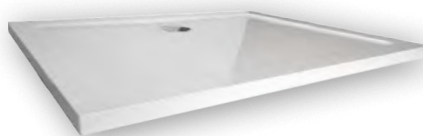

SMC shower tray, chrome-plated
drain valve D:11,5 cm, syphon

90 FLAT ARCHED SHOWER TRAY

90 X 90 X 4 cm

SMC shower tray, chrome-plated
drain valve D:11,5 cm, syphon

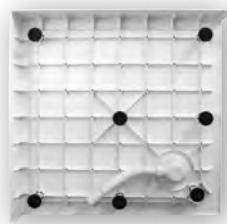

120 FLAT ANGULAR SHOWER TRAY

120 X 80 X 4 cm

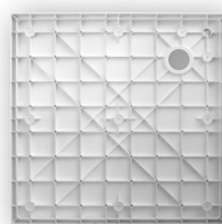

SMC shower tray, chrome-plated
drain valve D:11,5 cm, syphon

The shower tray made of SMC material is high impact resistant, has a large compressive, flexural and tensile strength, does not crack, its temperature stability is odd (non-thermal expansion), chemical resistance, has a good thermal insulation capacity, easy to clean and, of course, waterproof.

**In case of flat shower tray recessed preparation necessary for the siphon.
For more details ask our retailers.**

Myline massage systems

Myline massage systems

Choose individual massage system to your whirlpool.

When designing the massage systems, we were anxious to cover a wide range of products from simple to modern, for example a hydro massage system equipped with television. We are committed to offer everyone the right system, which provides the maximum comfort in everyday life. Our massage systems can be installed in any tub type of your choice. So you just have to decide which system fits your needs and your home best.

V-Concept™ back massage system

The peculiarity of the V-Concept back massage system, which was developed in cooperation of massage therapists and engineers, is the size and arrangement of the jets. Previous models had a common or two large jets and the water jet was aimed directly at the spine. In contrast, the smaller jets of the V-Concept model massage the muscles of the back side of the spine because of their arrangement, resulting in a fast and beneficial effect of relaxation.

Pneumatically operated massage systems

Hydro™ equipment:

- pneumatically controlled hydro massage system
- air control

HydroAir™ equipment:

- pneumatically controlled hydro massage system and Whirlpool system
- air control

Electronically controlled massage systems

E-Plus™ feel the unique hydro massage experience!

The E-PLUS™ massage system ensures that the time spent in the tub helps to really relax. Using the control you incredibly easy regulate the built-in functions and select the tub lighting to enjoy the beneficial effects of different colors. The drying system dries up the whole pipe system and thereby prevents the formation of algae and bacterial growth.

- Touchscreen Computer · digital hydro massage and whirlpool system · air control
- Chromotherapy lighting · Drying system · Water level sensor · Security lock

Option: Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

E-Drive™ TOUCH easy to operate, use, love!

With the digital display, the control of tubs equipped with the E-Drive™ TOUCH Massage System very easy: you need to take a rest in the tub and choose the function that will facilitate your relaxation. For perfect cleanliness of the water, a built-in ozone generator enriches your water with ozone. Optional, you can equip your tub with a water temperature control system through which your tub doesn't have to be constantly refilled with hot water.

- LCD Computer · Digitally controlled hydro massage and whirlpool system · air control
- Chromotherapy lighting · Drying system · Disinfection with ozone · Water level sensor
- Security lock

Option: Thermostat · Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

E-Max™ TOUCH Discover all aspects of a perfect bath!

In the tub with E-Max™ Touch Massage System, we have installed features that help you to completely unwind and relax in the tub. The positive effect of chromotherapy lighting can be felt most intensely in these models, since the central lighting is here supplemented by 12 small lamps on the side of the tub. Best you play your favorite music while relaxing your body with the aid of a massage!

- digital LCD display · digitally controlled hydro massage and whirlpool system · air control
- Water level sensor · Chromotherapy lighting · ozone generator

· Security lock · Thermostat · Drying system · FM radio and CD port · Exclusive chromotherapy lighting: 12 LED lights on the side of the tub

Silent™ hot air blower

The warm air bubbles massage your skin gently combined with a pleasant effervescent effect. Its other big advantage is that this slows the cooling of the water. With the Silent™ engine, we have reduced the noise level of our whirlpool motor with hot air.

Slim jets

the new SLIM jet and the suction rise only 1.5 mm from the tub and this way secure a pleasant bath. Thanks to the individual planning, the tubs equipped with hydro massage system towers are outstanding both from aspects of convenience and design.

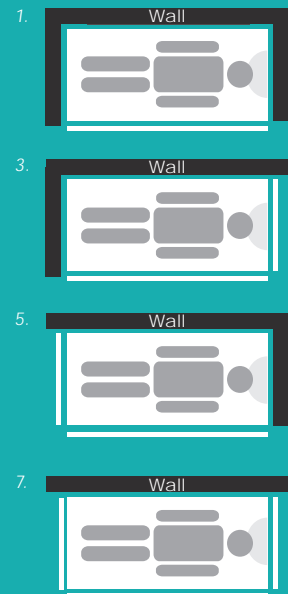

Finished with nanotechnology

our nanotechnology treated surfaces preserve due to the so-called lotus effect their outstanding properties for many years. This option can be used for all of our massage whirlpools, hydro-massage baths and massage cabins. Because of the surface treatment with nanotechnology, the daily chemical cleaning can be accomplished far more quickly - you will need up to 80% less chemicals for the same result.

Left Handed

Exclusive chromotherapy

Direct underwater lights at the side of the tub consisting of 12 LED bulbs which glow in accordance with the built-in chromotherapy lighting of the tub. The exclusive chromotherapy lighting can be ordered as an option to the E-Plus™ and E-Drive™ TOUCH massage systems and is standard equipment in the hydromassage bathtub with E-Max™ TOUCH and E-Multimedia™ TOUCH massage systems.

Chromotherapy lighting

Colors can affect our moods and emotions, which in turn have an effect on our bodies. The control units of the tubs change colors independently or you can select a button from the color that best fits your mood.

POLI-MAX™ reinforcement

Our spa's shell is a technological triumph, we have developed an entirely Eco-neutral acrylic/abs/polymer laminate system that results in a stronger, lighter, more stable, eco friendly and ultimately bio degradable product.

Why a Myline Spa & bathtub shell is better?

- Super quiet operation because the sound insulation is actually part of the shell – not just a sprayed on afterthought.
- Industry leading insulation properties, the entire shell system insulates so reducing energy costs and putting money back in your pocket.
- One of the industries best shell warranties for years to come..
- Eco friendly – Our Myline shells are ultimately bio-degradable and hazard neutral, we are proud of our lead in producing genuinely clean, green products from Europe's most modern hot tub factory.

Toilettes

Rimless toilettes

The most important property of the rimless toilettes is that there are no unattainable nooks and corners, therefore it is easy to keep it clean.

Precisely designed shape

The specially designed toilet bowl enables the water to clean the whole internal surface completely, without splashing.

Dual flush 4/6

The one-piece toilettes are all dual flush, with 4 or 6 litres respectively.

Slim Seat

The seats perfectly fit to the corresponding bowl. The Clement collection's Slim seat provides an elegant look.

Quick Release

The Wellis seats (except the Elle) are manufactured in the Quick release fashion. This solution provides easy installation, and facilitates the cleaning process too, because there's no need to remove the bolts, the seat can be removed with a single movement, and installed again the same way.

Soft Close

The seat also has a catch mechanism, which makes the closing independent of outside force as it is excepted nowadays. We hold ourselves to our principles and all of our seats are made with this technology.

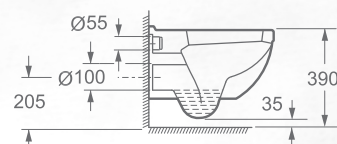

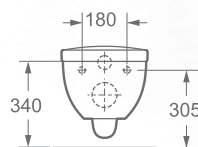

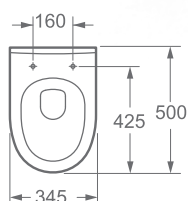

Hidden fastening

The wall mounted and the floor mount Wellis toilettes are supplied with hidden fastening. There is only one tiny fastening point. This makes the cleaning easier and more hygienic.

Quality assurance

Our quality is continuously benchmarked against the highest German production Standards under the TÜV certification protocol that we subscribe to. This ensures we constantly meet and exceed all relevant International quality standards.

- We are proud of this commitment to excellence and the clear differentiation from our market competitors that it affords us.
- Our TÜV certificate guarantees that our products are of excellent quality, and are regularly and independently monitored to meet and exceed the highest manufacturing standards.
- The CE label on all our products reassures our customers that the design and build meets or exceeds all relevant EU standards.

10-YEAR warranty bathtub

The first requirement for a 10-year warranty is avoiding mechanical abrasive materials (like polishing powder) or corrosive fluids during maintenance and cleaning. The producer does not take any responsibility for damages incurred by improper cleaning. The second requirement for the 10-year warranty is application of Myline bath legs and their proper installation according to the manual. If the user drills a hole on the bathtub, then the warranty is not valid anymore. No cover is allowed to be mounted on the upper rim of the bathtub. There is an exception, however, for test products for exhibition or products with reduced price. We offer a 5-year warranty for our tap collection.
